

## STONEWALL INTRANET

1. Create a shared folder (choose those that you want to view the intranet and give them viewable rights) and name it "intranet" on your server.
2. Open up Front Page and create your main default page.
3. To save: file → save as → (find your folder named intranet)
4. It is advisable to create a folder within the intranet folder. Save all your clipart and pictures in this folder..
5. The URL for you intranet page will be \\servername\sharename(shared folder name)\documentname.htm You type it in your web browser just as you would any other address.
6. You might want to create a folder for each area in your site.

Here are the topics that Stonewall uses in their Intranet site.

<u><a href="#">Stonewall Intranet Links</a></u>		<u><a href="#">Internet Links</a></u>
